UTV Stereo
PERFORMANCE AUDIO

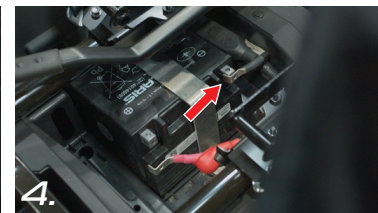

1. Unplug the OEM plug shown here from the seat (If Equipped)
**Repeat for the other side*

2. Move the seat all the way forward and lift up to remove from vehicle
**Repeat for the other side*

3. Disconnect the OEM battery positive lead

4. Disconnect the OEM battery ground lead

5. Pop out the zip tie shown here

6. Take the 2 zip ties and run it under the seat mount through the rubber grommet and up through center console as shown

7. Use electrical tape to cover BOTH leads on passenger side of harness to avoid sparking
**DO NOT unwrap until you are ready to connect 2nd battery*

8. Use electrical tape to attach harness to the zip tie

9. Run the harness under the seat mount and out through the center console as shown

10. Run the harness to the passenger side
**Make sure to run wire OVER TOP of the bar in center console*

11. Run the harness down through the center console and out the small hole under the seat mount as shown

12. Place a metal clip shown here on the floor of the vehicle

13. Place a speed clip shown here on the side of the center console

14. Move the seat mount forward all the way and place the UTV Stereo 925 Battery into the vehicle

15. Line up the battery bracket with the metal speed clips you placed in previous step and use included bolts to secure to vehicle

16. Connect the positive lead on the OEM battery

17. Connect the ground lead on the OEM battery

18. Unwrap the ground lead on the 2nd Battery and connect to the battery

19. Unwrap the positive lead on the 2nd Battery and connect to the battery

WARNING!
LEADS WILL BE LIVE!

DO NOT TOUCH WIRES TOGETHER OR TO ANY METAL SURFACE IN THE VEHICLE.

THIS COULD DAMAGE THE BATTERIES OR THE VEHICLE.
