This subwoofer enclosure works under front or rear passenger side seats

Run your speaker wire through the enclosure grommet.

*\*Use window cleaner as lubricant*

Lift the passenger seat and remove the bolt shown here

Remove the single screw shown here

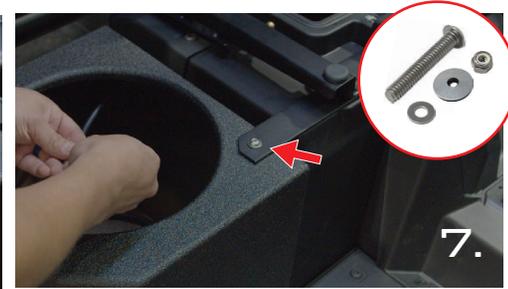

Place the enclosure into the vehicle and plug in the speaker wire

Carefully lift the metal seat bracket shown to make room for the mounting bracket

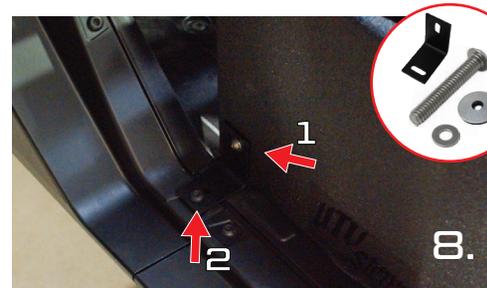

Reinstall the factory bolt

Secure the bracket to the enclosure using included hardware

Scan to watch the Installation Video!

Attach the L-Bracket to the enclosure first, then to the vehicle

Make the connections to your subwoofer and place into the enclosure

Align the subwoofer to your liking and use included subwoofer hardware to secure the subwoofer to the enclosure
